BBA

Protein Structure & Molecular Enzymology

Vol. 1162, 1993

Cumulative Contents

Information for Contributors vii

Regular Papers

Amino-acid sequence of the cooperative dimeric myoglobin from the radular muscles of the marine gastropod *Nassa mutabilis*
A. Parente, C. Verde, A. Malorni, P. Montecucchi, F. Aniello and G. Geraci (Italy) 1

Comparing the human and schistosomal hypoxanthine-guanine phosphoribosyltransferases by circular dichroism
L. Yuan, C.-S.C. Wu, S.P. Craig, III, A.F. Liu and C.C. Wang (USA) 10

Kinetic behaviour of a repressible acid phosphatase from the yeast *Yarrowia lipolytica*: a comparative study between the solubilized enzyme, the enzyme bound to cell-wall fragments and the enzyme bound to intact cells
F.J. González, C. Fauste, F.J. Burguillo and A. Dominguez (Spain) 17

Amino-acid sequence of rusticyanin from *Thiobacillus ferrooxidans* and its comparison with other blue copper proteins
F. Nunzi, M. Woudstra, D. Campèse, J. Bonicel, D. Morin and M. Bruschi (France) 28

Resistance of archaebacterial aEF-1α · GDP against denaturation by heat and urea
M. Masullo, G. Raimo and V. Bocchini (Italy) 35

P36, a *Dictyostelium discoideum* protein whose phosphorylation is stimulated by GDP, is homologous to the α-subunit of succinyl-CoA synthetase
A.L. Anschutz, H.-D. Um, N.R. Siegel, M. Veron and C. Klein (USA, France) 40

Time-resolved fluorescence of S-100a protein in the absence and presence of calcium and phospholipids
G. Zolese, I. Giambanco, G. Curatola, G. De Stasio and R. Donato (Italy) 47

Two-dimensional crystallization of catalase on a monolayer film of poly(1-benzyl-L-histidine) spread at the air/water interface
A. Sato, T. Furuno, C. Toyoshima and H. Sasabe (Japan) 54

Studies on the location of aromatic amino acids in α-crystallin
R.C. Augusteyn, K.P. Ghiggino and T. Putilina (Australia) 61

Specificity for various imino-acid-residues of a proline-specific dipeptidylcarboxypeptidase from a *Streptomyces* species
S. Maruyama, S. Miyoshi, G. Nomura, M. Suzuki, H. Tanaka and H. Maeda (Japan) 72

Oxygen-binding properties of extracellular hemoglobin from the leech, *Hirudo medicinalis*. Effects of pH, cations and temperature
E. Ilan and J. Haroun (Canada) 77

Introduction of Ca^{2+}-binding amino-acid sequence into the T4 lysozyme
V.V. Leontiev, V.N. Uversky, E.A. Permyakov and A.G. Murzin (Russia) 84

Amino-acid sequence of cytochrome *c*-553 from *Desulfovibrio desulfuricans* Norway
M. Bruschi, M. Woudstra, D. Campese and J. Bonicel (France) 89

Transition state of an unfolding step in human cyanomet myoglobin
T. Konno and I. Morishima (Japan) 93

A corrected primary structure for dog-fish *Scyliorhinus caniculus* protamine Z3
M. Kouach, M. Jaquinod, D. Belaïche, P. Sautière, A. Van Dorsselaer, P. Chevaillier and G. Briand (France) 99

Kinetics of the equilibration of O_2 with *Panulirus interruptus* hemocyanin subunits a, b and c
C.R. Andrew, K.P. McKillop and A.G. Sykes (UK) 105

Loss of poly(ADP-ribose) synthetase activity without change in arginine-specific ADP-ribosyltransferase activity by acid-treatment; application of the treatment to simple assay for transferase in the presence of poly(ADP-ribose) synthetase
S. Doi, Y. Tanigawa, M. Tsuchiya and M. Shimoyama (Japan) 115

Interaction of EDTA with horseradish peroxidase: ^{1}H-NMR study
S. Modi (UK) 121

Purification of macacque liver flavin-containing monooxygenase: A form of the enzyme related immunochemically to an isozyme expressed selectively in adult human liver
A.J.M. Sadeque, K.E. Thummel and A.E. Rettie (USA) 127

Molecular dynamics simulation of a phospholipase A_2-substrate complex
S.T. Jones, P. Ahlström, H.J.C. Berendsen and R.W. Pickersgill (UK, Netherlands) 135

Methylisocyanate and actin polymerization: the in vitro effects of carbamylation
C.L. Kuckel, B.W. Lubit, P.K. Lambooy and P.N. Farnsworth (USA) 143

3-Hydroxy-3-methylglutaryldithio-CoA: utility of an alternative substrate in elucidation of a role for HMG-CoA lyase's cation activator
P.W. Hruz, V.E. Anderson and H.M. Miziorko (USA) 149

Characterization of antigenic epitopes of potato virus Y
M. Vuento, K. Paananen, M. Vihinen-Ranta and A. Kurppa (Finland) 155

Properties of an affinity-column-purified human deoxycytidylate deaminase
G.F. Maley, A.P. Lobo and F. Maley (USA) 161

Novel antibodies specific for proteolyzed forms of protein kinase C: production of anti-peptide antibodies available for in situ analysis of intracellular limited proteolysis
H. Kikuchi, S. Imajoh-Ohmi and S. Kanegasaki (Japan) 171

Characterization and sequencing of rabbit, pig and mouse angiogenins: discernment of functionally important residues and regions
M.D. Bond, D.J. Strydom and B.L. Vallee (USA) 177

FTIR spectroscopy study of PTHrP(1–34) involved in humoral hypercalcaemia of malignancy
D.R. McFarlane, E.F. McFarlane, J.A. Barden and B.E. Kemp (Australia) 187

Comparative steady-state fluorescence studies of cytosolic rat liver (GTP), *Saccharomyces cerevisiae* (ATP) and *Escherichia coli* (ATP) phospho*enol*pyruvate carboxykinases
M.V. Encinas, M.C. Rojas, H. Goldie and E. Cardemil (Chile, Canada) 195

Hemoglobin Ozieri: a new α-chain variant (α71(E20)Ala → Val). Characterization using FAB- and electrospray-mass spectrometric techniques
P. Ferranti, A. Parlapiano, A. Malorni, P. Pucci, G. Marino, G. Cossu, L. Manca and B. Masala (Italy) 203

Structure and function of protamines: an ^1H nuclear magnetic resonance investigation of the interaction of clupeines with mononucleotides
G. D'Auria, L. Paolillo, R. Sartorio and S. Wurzburger (Italy) 209

Determination of the secondary structure of epoxide hydrolase by Raman spectroscopy
Y.D. Ivanov, A.A. Izotov, I.G. Rukavishnikov and V.Y. Uvarov (Russia) 217

Valine dehydrogenase from a non-spore-forming bacterium, *Alcaligenes faecalis:* purification and characterization
T. Ohshima and K. Soda (Japan) 221

Rapid Reports

Dimethyl sulfoxide favours the covalent phosphorylation and not the binding of P_i to sarcoplasmic reticulum ATPase
E. Mintz, V. Forge and F. Guillain (France) 227

Evidence from sequence analysis that hen egg-white ovomacroglobulin (ovostatin) is devoid of an internal β-Cys-γ-Glu thiol ester
K.L. Nielsen and L. Sottrup-Jensen (Denmark) 230

Identification of autoproteolytic cleavage site in the Asp-49 mutant subtilisin J by site-directed mutagenesis
J.S. Jang, D.K. Park, M. Chun and S.M. Byun (Korea) 233

Regular Papers

Role of oligomeric interactions in the cooperativity of crayfish hemocyanin
N. Makino and H. Ohnaka (Japan) 237

Mode of action of three endo-β-1,4-xylanases of *Streptomyces lividans*
P. Biely, D. Kluepfel, R. Morosoli and F. Shareck (Canada, Slovak Republic) 246

Expression of smooth muscle and nonmuscle tropomyosins in *Escherichia coli* and characterization of bacterially produced tropomyosins
R.E. Novy, L.-F. Liu, C.-S. Lin, D.M. Helfman and J.J.-C. Lin (USA) 255

Substrate specificity of 'elastomucoproteinase': an enzyme which can degrade cartilage aggrecan
G. Cs.-Szabó, C. Fülöp, C. Hadházy, P. Elődi and T.T. Glant (USA, Hungary) 266

Activity modulation of the fast and slow isozymes of human cytosolic low-molecular-weight acid phosphatase (ACP1) by purines
J. Dissing, B. Rangaard and U. Christensen (Denmark) 275

Differential regulation of *S*-adenosylmethionine synthetase isozymes by gibberellic acid in dwarf pea epicotyls
M. Mathur, N. Sharma and R.C. Sachar (India) 283

A comparative study of the conformational properties of *Escherichia coli*-derived rat intestinal and liver fatty acid binding proteins
A. Muga, D.P. Cistola and H.H. Mantsch (Canada, USA) 291

Labeling of tyrosines in proteins with [^{15}N]tetranitromethane, a new NMR reporter for nitrotyrosines
W.J. Skawinski, F. Adebodun, J.T. Cheng, F. Jordan and R. Mendelsohn (USA) 297

Interaction of inositol hexakisphosphate with liganded ferrous human hemoglobin. Direct evidence for two functionally operative binding sites
M. Coletta, P. Ascenzi, R. Santucci, A. Bertollini and G. Amiconi (Italy) 309

Nucleotide cofactor-binding-domain-specific antibodies show immunologic relatedness among unrelated proteins that bind phosphoryl compounds
M.M. Tucker, L.M.S. Worsham and M.L. Ernst-Fonberg (USA) 315

Some properties of restriction endonuclease *Apa*BI from *Acetobacter pasteurianus*
J. Grones and J. Turna (Slovak Republic) 323

Cooperativity in the antibody binding to surface-adsorbed antigen
M. Werthén and H. Nygren (Sweden) 326

Cumulative Contents, Vol. 1162 333
